Harshit Jain

New Delhi, IN | +91 9773960061 | jainharshit2132005@gmail.com | Linkedin | Github | Portfolio

SKILLS

Languages: C++, Java, Python, JavaScript/TypeScript, SQL
CS Fundamentals: DSA, OOP, Operating Systems, Computer Networks, DBMS, Complexity Analysis
Backend & Systems: Node.js, Express.js, FastAPI, REST APIs, Redis, PostgreSQL, MongoDB, Distributed Systems
Frontend: React.js, D3.js, HTML/CSS
Cloud & Infrastructure: AWS, Docker, Kubernetes, CI/CD, Git
AI/ML: RAG, LLMs, LangChain, LangGraph, Vector Embeddings, TensorFlow

WORK EXPERIENCE

AdGrid **Gurugram, India**
ML Intern August 2026 - Present

- Built an asynchronous AI image-generation pipeline using FastAPI, Docker, AWS SQS, and asyncio, supporting concurrent batch generation and job-based result tracking.
- Built a dynamic RAG knowledge-base manager system using FastAPI, React, Gemini embeddings, and pgvector, enabling document CRUD with corresponding vector updates.
- Architected a conversational AI orchestrator using Gemini 2.5 Flash to classify merchant requests and route conversational or actionable workflows, with Redis for caching and session state.

CodeSquadz **Noida, India**
AWS & DevOps Training Program June 2025 - July 2025

- Completed a **1-month on-site Cloud & DevOps internship program**, working with **AWS and Docker**, and built CI/CD pipelines and deployment workflows that reduced deployment steps, gaining experience with cloud infrastructure and DevOps automation.

PROJECTS

Forensiq (Physics Wallah Hackathon Winner) | React.js, Express.js, Graph Theory, D3.js **[Live Link]**

- Engineered a **graph-based financial forensics engine** using DFS and temporal sliding windows to detect money laundering patterns (Routing, Smurfing, Shell Nets) across **100K+ transactions in under 30 seconds**, with a D3.js dashboard letting investigators visually explore 10K+ transaction nodes and mapped fraud rings.

Karigar Mart (Sprint4Good Finalist – Top 6) | React.js, MongoDB, Node.js, Express.js **[Live Link]**

- Built a full-stack multi-vendor AI powered e-commerce platform, integrated Cloudinary-based media pipelines and an AI marketing video system (Veo, ElevenLabs) delivering videos in **< 60 seconds** with real-time SSE updates.

VisoRead (Winner ×2 – IIITD Product-a-Thon) | React Native, ESP32 **[Prototype]**

- Built a hybrid online/offline AI assistive vision system achieving **80%+ offline OCR accuracy**, **2–3×** text consistency improvement, and **~60%** latency reduction via parallel Gemini Vision + ElevenLabs pipelines, supported by a **300+ rule** NLP engine and **10,000+ word** dictionary. Source code not publicly available due to **patent in process**.

ACHIEVEMENTS

- **5x Hackathon Finalist** [**Winner:** 2 x IndustrySolve 2025 (IIIT Delhi), RiFT Hack (Physics Wallah); **Runner ups :** Hackdata' 26 (SNU), IQOO National Hack 2026]
- **Solved 1200+ Data Structures & Algorithms problems** across LeetCode, Codeforces and CodeChef.
- **Knight** @LeetCode (1918) with a **500** day problem-solving badge (2026), **Pupil** @ Codeforces (1313) and 2*(1569) on CodeChef
- Achieved **Global Rank 379 / 39k** in **Biweekly 186** on LeetCode.
- Achieved **Global Rank 627** in CodeChef **Starters 221**.
- **Shortlisted** for interview rounds at **AlgoUniversity** among **20,000+** applicants nationwide

.

EDUCATION

Guru Gobind Singh Indraprastha University (2023-2027) **New Delhi, India**
Bachelor of Technology in Computer Science Engineering Cumulative GPA: 9/10
Relevant Coursework: Data Structures, Algorithms, Computer Networks, AI & ML, Database Management Systems
